

## **EXPERIMENT NO:06**

Name: Saylee Shirke

Batch: T22

Roll no: 101

**Aim:** To study agile methodology and test case management using JIRA tool. To create scrum board for scrum master using JIRA tool.

### **Theory:**

Jira is a software development tool that helps teams plan, track, and release software projects. It's a popular tool among software development teams.

JIRA is a widely used issue tracking and project management software developed by Atlassian. The theory behind JIRA revolves around several key principles and concepts:

### **IssueTracking:**

At its core, JIRA is designed to help teams track tasks, bugs, features, and other issues within a project. It provides a centralized platform for capturing, organizing, and prioritizing these items.

### **AgileMethodologies:**

JIRA supports agile methodologies such as Scrum and Kanban, enabling teams to plan, track, and deliver work in iterative cycles.

Agile principles emphasize collaboration, adaptability, and delivering value to customers.

### **WorkflowManagement:**

JIRA allows teams to define custom workflows that represent the lifecycle of an issue from creation to completion. Workflows can include various statuses, transitions, and conditions to reflect the specific processes followed by the team.

### **Customization:**

One of the key strengths of JIRA is its flexibility and customization options. Teams can tailor JIRA to their specific needs by creating custom issue types, fields, workflows, and project configurations.

### **CollaborationandCommunication:**

JIRA facilitates collaboration among team members by providing features such as commenting, mentioning, and attaching files to issues. It also integrates with other Atlassian products like Confluence and Bitbucket for seamless communication and knowledge sharing.

### **ReportingandAnalytics:**

JIRA offers robust reporting and analytics capabilities, allowing teams to gain insights into their project progress, team performance, and other key metrics. Users can create custom dashboards, charts, and reports to monitor and analyze project data.

**Integration:**

JIRA integrates with a wide range of third-party tools and services, including development tools, CI/CD pipelines, customer support systems, and more. This integration ecosystem enables teams to streamline their workflows and improve productivity.

**Scalability and Performance:**

JIRA is designed to scale with the needs of growing teams and organizations. It can handle large volumes of data and users while maintaining performance and reliability.

The screenshot displays the Jira web interface for a project named "MyScrumProject". The top navigation bar includes links for "Your work", "Projects", "Filters", "Dashboards", "Teams", "Plans", "Apps", and a "Create" button. A "Premium trial" badge is visible in the top right corner.

The left sidebar contains a "MyScrumProject" section with a "Software project" icon. Below this, there are sections for "PLANNING" (Summary, Timeline, Backlog, Board, Forms, Goals) and "DEVELOPMENT" (Code). The "Backlog" item is currently selected.

The main content area is titled "Backlog" and shows a list of items. At the top, there is a search bar and a "Clear filters" button. The items are organized into sections:

- Epic**: A section with a search bar and a "Clear filters" button. It contains two items: "GMAIL sprint 1" (4 Feb - 18 Feb, 1 issue) and "SCRUM Sprint 2" (4 Feb - 18 Feb, 1 issue). Both items have a "Complete sprint" button.
- Issues without epic**: A section with a search bar and a "Clear filters" button. It contains one item: "SCRUM-5 GMAIL Sprint 1" (ISSUES WITH... DONE). It has a "+ Create issue" button.
- SCRUM Sprint 3**: A section with a search bar and a "Clear filters" button. It contains one item: "SCRUM-3 GMAIL-1 Verify Gmail Functionality" (TO DO). It has a "+ Create issue" button.
- Backlog (2 issues)**: A section with a search bar and a "Clear filters" button. It contains two items: "SCRUM-3 GMAIL-1 Verify Gmail Functionality" (TO DO) and "SCRUM-6 GMAIL-1 Venty Gmail Functionality" (ISSUES WITH... IN PROGRESS). It has a "+ Create issue" button.

The right sidebar features a "Your 30-day Premium trial" banner. Below the banner, there is a list of tasks to complete the trial:

- Create a project
- Create an issue
- Create Issue! (with a YouTube video thumbnail)
- Issues are individual pieces of work that you assign to teammates.
- Show me
- View issue tutorial
- Start with the basics
- Invite your teammates
- Connect your tools
- Get the mobile app
- Find help

At the bottom of the right sidebar, there is a "Dismiss Quickstart" button.

**Conclusion:** Thus, we have successfully studied agile methodology and test case management using JIRA tool and create scrum board for scrum master using JIRA tool.
